

# NEWS of the RACK VCV

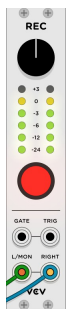

key events • new modules • developer news • module videos • contests • and more

Hello, everyone in Rack-Land,

some developers of hardware modules now use VCV-Rack to allow potential buyers a free testing. In my opinion this is a great idea, because even on the Superbooth or in the shop we trust, you can't spend unlimited time with a module before you make the bond of life with it. If this example finds even more imitators, then all Rack-Landers will definitely face golden times.

Now for the news.

### Developer News and other News

The sensational announcement for VCV-Rack 1.0 continues. The new VCV Recorder will record mono/stereo audio and even video from the rack screen. It will support the most common formats with configurable quality settings.

On Google Maps VCV-Rack users can now register on a map. This visualizes where users are situated.

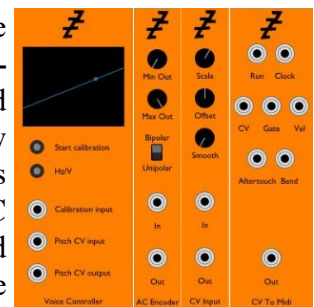

### New Modules

This week we welcome another module developer to the Plugin Manager.

Alright Devices provides its two hardware modules T-Wrex, a Bitcrusher and Chronoblob2 a delay free of charge as VCV rack versions. This allows potential buyers to extensively test these modules before purchasing the hardware.

Also this week there are new modules from Expert Sleepers. The paid package Silent Way consists of the modules Voice Controller, AC Encoder, CV Input and CV to Midi and can be purchased via the Plugin Manager.

Bogaudio has revised some modules in version 0.6.14 and released the switches 8:1 and 1:8, as well as the 8-Step Sequencer ADDR-SEQ.

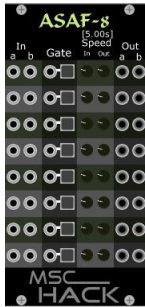

### Challenges & Collaborations

#### Very Cool Patch Challenge

In Edition 29, any drum or percussion module (including sampler modules with percussive samples) shall be used to create a patch with an odd beat (for example, 5 or 11 beats to a beat) and/or a polyrhythm. Contributions can be uploaded until 22 April and a new challenge will be announced the following Tuesday. As always,

the contributions are summarized in a playlist. More information in the official VCV-Rack Forum at <https://community.vcvrack.com/t/very-cool-patch-challenge-edition-29/2788>

In **Edition 28** the module to be used was **ASAF-8** from **mScHack**. A click on the module leads to the playlist.

## Collaboration chain patch game Nr. 1

One World - One Voice did it, VCV-Rack now also has a **musical chain letter**. It all started with **rsmus7**, who also had the idea for this action. He has created a patch and invited to **develop it further**. Branches are definitely desirable, so that completely new things can develop from it. More information about CCPG # 1 is available at <https://community.vcvrack.com/t/new-collaboration-chain-patch-game-nr-1-is-on/2597>

**Geodesics calls for the Gold Edition Challenge:**

==THE CHALLENGE==

Use the **demo patch of Entropia**, and turn it into something of your own, make it evolve, or destroy it as long as the DNA is kept.

== THE DEADLINE ==

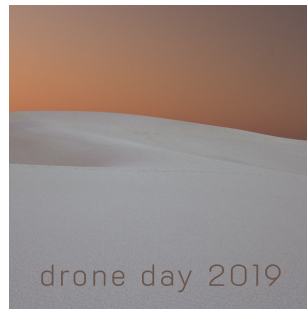

**28 April 2019** no timezone – to be followed by

one week of vote

==THE REWARD==

A **redesigned gold edition** of the entire Geodesics collection (5 modules). This pack will never be public and will be enjoyed only by the winner of the challenge. In case of a tie, the design will still be different for each winner.

For more information about the rules, see <https://community.vcvrack.com/t/geodesics-gold-edition-challenge/2762>

**CALL FOR SUBMISSIONS: Drone Day 2019**

After the Winter Sostice Drone **Ben de Groot** alias **ablaut** now calls for participation in **Drone Day 2019**. This is on **May 25th** and like last year he would like to release a drone mix on Bandcamp for free download. The deadline for contributions is **19 May**. A click on the picture leads to the original article and **further information**.
