NEWS
of the RACK
VCV

Hello, everyone in Rack-Land,

the most important news may not have been noticed, because it was published in the forum in the thread Rack v1 development blog. Andrew Belt estimates that VCV-Rack version 1.0 will be released between June 1st and 14th. Those who can't wait (like me) can compile a current working version and some modules themselves. And new modules are constantly being added, like just now Vult!

And now for the news.

Developer News and other News

VCV Master Mind **Andrew Belt** will be giving a talk on "VCV Rack, the open-source virtual modular synthesizer" in Kingsport, TN on May 14th.

In **Rack v1** you can adjust the **rotation of the cable colors** by editing settings. json with a text editor.

```
"cableColors": [
  "#c9b70e",
  "#0c8e15",
  "#c91847",
  "#0986ad"
]
```

The **Superbooth 2019** casts its shadows ahead. From **9 - 11 May 2019** this popular fair for electronic musical instruments will take place in Berlin. As already mentioned there is also the possibility to meet other members of the **VCV community** to get to know each other, chat and eat/drink together. **Omri Cohen** has opened a facebook group especially for this purpose.

On **Google Maps** VCV-Rack users can now register on a map. This visualizes where users are situated.

The paid modules of **BB Modules** have been revised and are now at version **0.6.3**. You can buy them via gumroad.

The **Vult** modules for **VCV-Rack v1** can now be tested. If you can compile Rack v1, you can download the **free version** of the modules at **https://github.com/modlfo/VultModules/releases/tag/1.0.0-preview**. If you own the **commercial modules** and want to test them, you can send a **message to Vult**.

Valley has announced a filter for this month called **Feline**, based on the OTA model, which is best known for Roland's Jupiter 8 and Juno 60.

New Modules

Again we welcome new module developers.

In the overview table of week 17, I already listed **Aradicity**, but unfortunately forgot to mention its modules. I'm sorry about that, and I'll catch up here as soon as I can. **clock Div** is a clock divider, **bit crush** a bit crusher and **clip** a hard clipper. Binaries for Linux and Windows can be downloaded from the developer's github page.

The **Surge Synthesizer** will also be available for VCV-Rack soon. An early **pre-release version** can already be downloaded from the developer's github page. This has to be compiled by yourself.

Kosmodules offers the free Dual Offsetter **OSFx2** as well as the two modules **Distribution** and **Strings**. The latter do not seem to be available yet, but the free module can already be downloaded from the developer's github page for selfcompiling.

StochKit provides modules for stochastic synthesis. **Grandy** is a Stochastic Synthesis Generator, **Stitcher** is designed for linking up to 4 Grandy oscillators, **GenECHO** is responsible for the decomposition of stochastic processes.
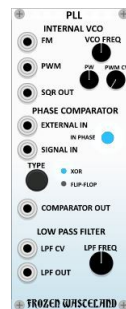

CatroModulo has reworked its modules and is now at version **0.6.5**, new added is the Clock Divider **vcClk--**.
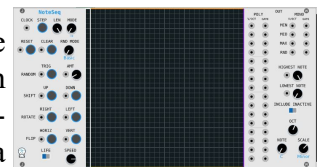

Challenges & Collaborations

Very Cool Patch Challenge

In **Edition 30** of the **Very Cool Patch Challenge**, the module to be used is the **PLL Phased Locked Loop** from **Frozen Wasteland**. Contributions can be submitted until **May 6th** and these will be summarized in a playlist as usual.

In **Edition 29** any drum module could be used and the **playlist** is available at the following link https://youtu.be/4axu28WObdQ?list=PL3uoDdw5f0IyMySWMwuTAq9dm2c0zGlAi

Weekly Challenge #4

In the weekly challenge of the **VCV blog** on **reddit** you have to create a patch with a maximum of **15 freely available modules**, one of which must be the **NoteSeq** sequencer of **JW modules**. More information at https://www.reddit.com/r/vcvrack/comments/bk6ogh/weekly_challenge_4/

Collaboration chain patch game Nr. 1

One World – One Voice hat es vorgemacht, VCV-Rack hat nun auch einen **musikalischen Kettenbrief**. Den Anfang machte **rsmus7**, der auch die Idee für diese Aktion hatte. Er hat ein Patch erstellt und dazu eingeladen, dieses weiterzuentwickeln. Dabei sind Verzweigungen durchaus erwünscht, so dass sich vollkommen neue Dinge daraus entwickeln können. Mehr Informationen zum **CCPG #1** gibt es unter https://community.vcvrack.com/t/new-collaboration-chain-patch-game-nr-1-is-on/2597

NEWS of the monthly RACK VCV

GEODESICS
gold edition challenge

CONGRATULATIONS JAN FRERDIK!

The winner of the **Geodesics Gold Edition Challenge** has been announced. **Jan Frerdik** alias Fome has used each Geodesics module at least 2x and used at least 3 Entropias in audio mode. So he skipped two places and landed in number one. **Omri Cohen**, who would have won undisputedly, was removed from the competition and receives his own **exclusive Gold Edition**. Congratulations to the winners, many thanks to all participants and many thanks to the Geodesics team for this challenge.
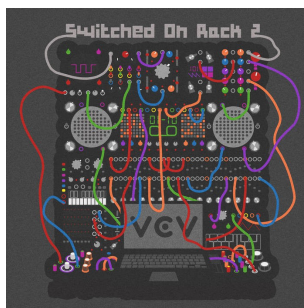

CALL FOR SUBMISSIONS:
Drone Day 2019

After the Winter Sostice Drone **Ben de Groot** alias ablaut now calls for participation in **Drone Day 2019**. This is on **May 25th** and like last year he would like to release a drone mix on Bandcamp for free download. The deadline for contributions is **19 May**. A click on the picture leads to the original article and **further information**.

Switched On Rack Vol. 2, an album with VCV-Rack music is now available on **Bandcamp**. You can also sign up for a **list** for the 3rd edition of this compilation.
